STHUTHY EVANGELINE M

AI Software Engineer | Evaluation Frameworks | NLP Expertise | Scalable Systems

+1 6179369366 sthuthy.evangeline@gmail.com 75 St Alphonsus Street, Boston, Massachusetts - 02120

SUMMARY

AI Software Engineer with 8 years of experience in MLOps and data science, expert in Natural Language Processing (NLP) and scalable AI systems. Key achievements include achieving a forecast accuracy exceeding 90% for over 10,000 products across three countries and enhancing MLOps pipelines by 30% through innovative workflow design. Seeking an AI Experience Researcher position at Apple is being sought, where MLOps and data science skills can be leveraged to support the company's mission of delivering exceptional and intuitive customer experiences through AI-powered products.

WORK EXPERIENCES

GenAI NLP Engineer - Internship

Dassault Systèmes

02/2026 - Present Johnston, Rhode Island, United States

- Designing a Neo4j knowledge graph to implement Graph RAG, modeling entities and relationships to improve structured retrieval and contextual grounding for LLM-based QA systems.
- Integrating Graph RAG with retrieval pipelines to enable multi-hop reasoning over connected nodes in the graph, improving RAG accuracy and reducing hallucinations in generated responses.

MLOps Engineer

Wipro

12/2022 - 12/2024 Bengaluru, Karnataka, India

- Streamlined MLOps pipelines by 30% by architecting custom workflows with RAG retrieval and LangChain integration for enhanced data processing and model training.
- Implemented over 5 LLM deployments using Kubernetes orchestration and AI agents to automate inference and monitor model performance in scalable cloud environments.
- Boosted fine-tuning efficiency by 40% by applying PEFT methods such as LoRA with LangChain, enabling rapid adaptation of LLMs to domain-specific tasks while reducing compute costs.

Senior Data Scientist

Wipro

09/2021 - 12/2022 Bengaluru, Karnataka, India

- Achieved forecast accuracy exceeding 90% for 10,000+ products across three countries by deploying advanced time series forecasting models.
- Streamlined resource planning in US, Canada, and Mexico by operationalizing e-commerce demand forecasting models across multiple divisions.
- Improved classification and segmentation accuracy by developing and deploying deep learning models, enhancing operational efficiency and cost savings.
- Automated end-to-end pipelines for data ingestion, preparation, model training, scoring, and performance tracking for time series forecasting projects.

Machine Learning Engineer

Cognizant

07/2016 - 08/2021 Chennai, Tamilnadu

- Improved pharmacy workflow efficiency by 30% by developing an NLP-based electronic prescribing solution used by a leading pharmacy chain to extract and map clinical insights.
- Accelerated hurricane damage assessment by 70% by deploying a satellite imagery ML SaaS, automating claims adjustments across 4–5 days.
- Enhanced document review by building an application highlighting changes in medical files, supporting DOCX uploads with semantic change mapping.
- Optimized deployment efficiency by 40% through CI/CD pipeline enhancements using GitLab Runner, AWS, Docker, Kubernetes, and Airflow.

PERSONAL RESEARCH

Medicare Knowledge Graph Assistant with LLMs

An AI-powered Medicare application that uses Named Entity Recognition (NER) to extract diseases, drugs and symptoms from clinical text. The system builds a knowledge graph to detect and explain potential drug interactions and treatment conflicts, enhancing clinical decision making with transparency.

STRENGTHS

Learning Dynamo
Driven by relentless curiosity, rapidly acquiring new skills and adapting to evolving technologies with 100% upskilling completion.

Collaborative Team Player
Excel at collaborating within diverse teams to deliver data-driven solutions on-time.

CERTIFICATIONS

AWS - Machine Learning Specialty

Rapidminer - Machine Learning Professional

SKILLS

AI/ML

Data Visualization | EDA | Machine Learning | Deep learning | Generative AI | NLP/NLG | Computer Vision | Ensemble Methods | Model Optimization

Programming

Python | PyTorch | Sklearn | Seaborn | Matplotlib | Rapids AI | Azure | TensorFlow | Transformers | NumPy | Pandas | RAG | Graph RAG | LangChain | LangGraph | Transformers | LLMs | JavaScript | Fast AI | AWS | Neo4j | Java | OpenCV

MLOps

Git | MongoDB | CI/CD | Docker | Kubernetes | Airflow | MLFlow | RESTAPI | Flask | FastAPI | Grafana | Prometheus | SQL / NoSQL | Unit Testing | Confluence

PUBLICATIONS

Development of a Life Detection Robotic System using a Pyroelectric Device

International Journal of Advanced Engineering Science and Information Technology.

EDUCATION

MS in Artificial Intelligence

Northeastern University, Boston

01/2025 - Present

ME - Applied Electronics

PSNA College of Engg & Tech, Dindigul

06/2014 - 06/2016

BE - Electronics & Communication Engg

RVS College of Engg & Tech, Coimbatore

07/2010 - 05/2014
